Kathleen –

Attached is a clean final draft of the cover letter for your and Jared's review. To produce this, we incorporated all of OFA's edits, then made a few edits to that version, where necessary to ensure accuracy and improve readability. I am also attaching our mark-up of OFA's version so you can see exactly what we changed. As I mentioned in our phone conversation this afternoon, the paragraph that required the most careful crafting was the one about the need for an alternative that will enable water quality standards to be met. Tom approved my revision of that paragraph, with one edit, which I incorporated. Tim sent some additional suggestions. I incorporated a couple of his wording changes, but did not use all of his language because the points he was making are addressed elsewhere in the letter/Detailed Comments, and incorporating them in that particular paragraph would stray too far from HQ's language. Stephanie reviewed the entire revised letter for any red flags that I might have missed, and found none.

I will be in the office tomorrow, and Stephanie will be working at home, so please let me know if you want any further changes. We're going to rest up now so that we'll be ready to tackle OFA's edits to the Detailed Comments tomorrow.

-Kathy
